Design and Processing of Multi-Dimensional Signals

Message from the Guest Editors

The design and processing of multi-dimensional signals have sparked intense interest from the research community. In this respect, various requirements in systems, such as sensor, radio, ultrasound, sonar, speech, holographic, and photographic systems, call for elaborate design of the multi-dimensional signal, which also expedite the theoretical developments in multi-dimensional signal processing. Capitalizing the acquisition of information in multiple dimensions, a host of applications, ranging from remote sensing, communication systems to internet of things, can benefit from multi-dimensional signal processing, where different signal characteristics are properly fused to gain complete knowledge in a given application field. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
