Microfluidic Sensors for Biomedical Applications

Message from the Guest Editor

As the world becomes increasingly concerned with biomolecular disruptor activity, and since the threat of bio pollutants/bioterrorism can be substantially mitigated if detected early, the demand for real-time/on-site detection of bioparticle is expanding quickly. However, current technology is expensive, technically complicated and not portable/compact to use at the contamination sites. So there is a need to develop a robust, rapid lab-on-a-chip (LOC) for detecting bioparticles. This journal covers a multidisciplinary research topics that include, Micro-total-analysis systems (MicroTAS) and lab-on-a-chip applications for biomedical devices; transport in biological and molecular systems; wearable biosensor utilizing the microfluidics devices, Electrokinetic, electrohydrodynamic, and magnetohydrodynamic for biomedical applications; Micro- and nanoscale biomedical devices; Biologically enabled microfluidics; and Sensors and transducers for interdisciplinary applications.

- micro- and nanofluidic bio sensors
- BioMEMS devices and systems
- transport in biological and molecular systems
- biologically enabled microfluidic

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
