Energy-Efficient Wireless Communication Systems

Message from the Guest Editors

Wireless telecommunication systems are stepping through significant evolutionary modifications, driven as always by application needs which constantly demand higher bitrates. One key factor is now deserving particular attention: energy saving. More than ever, energy efficiency specifications and figures are in the spotlight of the processes determining the evolution of telecom systems, in line with the worldwide social and economic awareness towards energy. Cellular networks are fast moving toward solutions where energy beams are directed towards handset units, instead of widespread energy in all directions; power amplifiers are driven into new architectures and design techniques that aim to reduce the dissipation loss while maintaining the desired delivered power; signal processing techniques are also evolving to permit energy-efficient transmitter operation within the specifications; sensor networks foresee the deployment of very-low-power transmitter/receiver units, supporting an ever-growing range of applications; and in many other fields of wireless communications we see a trend driven by energy saving.

Guest Editors

Dr. Telmo Cunha

Prof. Dr. Thomas Eriksson

Dr. Pere L. Gilabert

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
