Special Issue

Extended Reality: Applications in Rehabilitation

Message from the Guest Editors

The field of rehabilitation is ideally suited to the development of novel applications of extended reality (XR) technologies. Applications range from immersive experiences for treating post-traumatic stress injury to wheelchair athlete performance optimization. Immersive experiences can be provided in large VR caves or using a cell phone. This Special Issue will focus on research evidence that supports applications of XR in rehabilitation, demonstrating the potential for XR for studying real world problems linked to the biomechanics of movement and the application of XR to mitigate lost mobility due to pain or physical deconditioning. The societal impact of these immersive experiences has the potential to be substantial as our populations age and cultural changes come to recognize the importance of treating occupational stress injuries.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
