

## Special Issue

# Emerging Robots and Sensing Technologies in Geosciences

### Message from the Guest Editors

We are proud to announce this special issue addressing the state-of-the-art of robotic systems and related sensors technologies applied to Geosciences. Topics **within the domain of this special issue** include, but are not limited to:

- Air, ground and maritime robotic systems.
- Novel perception system, event-triggered sensing.
- Sensors (of all kinds) and (data-driven) sensors fusion.
- Open-source software/hardware and mechatronics.
- Informative path planning and adaptive sampling.
- Internet of Things.
- Augmented Reality/Virtual Reality applications.
- Big data and Machine learning.
- Open-issues and challenges.
- Precision agriculture, nature conservation, and land degradation assessment, etc.
- Applications and case studies are very welcome!

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
