Electrochemical Sensors and Platforms: Design and Application

Message from the Collection Editors

At present, electrochemical sensors are widely used in routine analytical measurements as well as in different areas of scientific research. Thanks to the long-lasting devotion and work of a large number of pioneering research groups, certain electrochemical sensors excel in terms of a short response time, high selectivity, sensitivity, lower limit of detection, etc. The flexibility of sensors' structure and size allow their application in solving reaction mechanisms, in studying the fine details of biological processes or corrosion steps, etc.

Applications of new mechanisms and materials are being tested to improve selective analyte recognition, as well as for signal formation or transmission. New manufacturing methods have been developed or tested for the fabrication of advanced sensors with improved measuring properties. This Special Issue aims to highlight the current state-of-the-art in the field of sensor design as well as the application of sensors in various analytical tasks. Link:

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
