

## Special Issue

# Analysis of FAIR Data from Medical Sensors

### Message from the Guest Editors

The development of information technology and telecommunications has reached a level where their usefulness can be applied for healthcare needs towards Telemedicine and Telecare, which represent a promising alternative to traditional hospital admission. This basic premise is included in all strategic plans of the European Union and the rest of the world. Research efforts are focused on the development of devices and instruments that are smaller, simple to use, and reliable. The measurements from these devices, which are novel both in terms of their duration and activity coverage, also require novel approaches to their analysis. Efficient and reliable methods for analysis of signals acquired by wireless body devices will increase the interest in them and will push them forward to become the new standard in patient monitoring and healthcare. These algorithms should be able to deal with different challenges present in the data, including noise and sparsely sampled signals.

### Guest Editors

Dr. Aleksandra Rashkovska

Dr. Dragi Kocев

Dr. Panče Panov

### Deadline for manuscript submissions

closed (25 November 2021)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
