

## Special Issue

# Fault Detection and Data Analysis for Structure and Infrastructure Engineering

### Message from the Guest Editors

During the lifetime of structures and infrastructure engineering, faults inevitably occur, which are a great threat to their safety and durability. At present, advanced fault-detecting devices and sensing technologies are booming with the rapid development of emerging technologies, such as smart materials, intelligent construction, Big Data, artificial intelligence, and the Internet of Things. This provides access to high-quality data for analyzing the mechanism of faults occurring and, thus, their influence on the service performance of structure and infrastructure engineering. It is acknowledged that the fusion of detecting technologies and data analysis will be efficient tools for solving many scientific problems in structure and infrastructure engineering which were either unclear or unsolvable before.

This issue will include papers related to fault detection and data analysis for structure and infrastructure engineering. Original contributions that address both theoretical and experimental issues are welcome, and so are review articles on specific topics within the scope of this issue.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
