

Special Issue

Full-Duplex Wireless Communication

Message from the Guest Editors

This Special Issue will provide a synthesized source of recent research results and to serve as a springboard for future work in Full-Duplex Wireless Communications. The possible topics include, but are not limited to the following:

- Advanced self-interference cancellation techniques for full-duplex
- Advanced antenna and transceiver designs for full-duplex
- Full-duplex reconfigurable intelligent (meta)surfaces
- Full-duplex techniques with wireless power and energy harvesting
- Full-duplex for simultaneous communication and sensing
- Full-duplex millimeter-wave/THz systems
- Multiple input multiple output full-duplex transceiver design
- Performance analysis of full-duplex transceivers, systems, and networks
- Physical layer security and full-duplex techniques
- Resource allocation and user scheduling in full-duplex networks
- Stochastic geometry for full-duplex systems
- Experimental evaluation of full-duplex transceivers and networks

Guest Editors

Dr. Besma Smida

Associate Professor, Department of Electrical and Computer Engineering, University of Illinois at Chicago, Chicago, IL, USA

Dr. George C. Alexandropoulos

Department of Informatics and Telecommunications, National and Kapodistrian University of Athens, 15784 Athens, Greece

Deadline for manuscript submissions

closed (10 February 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
