Fluorescent Protein Sensors

Message from the Guest Editors

This Special Issue encourages authors to submit new research results concerning mechanism analysis, structure designs, and application innovations for fluorescent protein sensors. The Special Issue topics include but are not limited to: New sensor design; Novel applications; Cell visualization; Subcellular localization; Protein–protein interactions; The luminous mechanism; Structure analysis; and Ultrafast spectroscopy analysis.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
