

Special Issue

Advances in Flow and Wind Sensors

Message from the Guest Editors

Flow sensors and wind sensors are strictly related devices, since both involve the direct or indirect measurement of a fluid velocity. In last decade, the interest in flow sensors has been steadily increasing, driven by the need of smart systems for the management of fluids in the next generation of home appliances, autonomous vehicles, and biomedical devices. Similarly, emerging applications in the field of smart agriculture, aerospace, environment monitoring, and flight assistance for unmanned vehicles are urging the development of innovative wind sensors with adequate performances. This Special Issue is devoted but not limited to the following topics:

- Theory of flow sensors and wind sensors;
- Technology of flow sensors for liquids;
- Technology of flow sensors for gases;
- Flow and wind sensors based on MEMS devices;
- Flow sensors for microfluidic devices and systems;
- Emerging applications of flow and wind sensors;
- Experimental characterization and calibration of innovative flow and wind sensors.

Guest Editors

Prof. Dr. Paolo Bruschi

University of Pisa, Dipartimento di Ingegneria dell'Informazione, via Caruso 16, I-56122 Pisa, Italy

Dr. Massimo Piatto

Department of Information Engineering, University of Pisa, 56122 Pisa, Italy

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
