

## Special Issue

# Frontiers in Non-destructive Monitoring for Structural Integrity Assessment and Material Characterization

### Message from the Guest Editors

New materials expand the design capabilities of multi-material structures. In view of increasing requirements regarding structural integrity, new assessment methods are required that capture new phenomena and occurring interdependencies, between structures and their materials. Therefore, novel approaches to material characterization and non-destructive monitoring at the material and structural levels can provide a new paradigm of how we understand the structure–property–process (SPP) relations between materials and structures. Furthermore, the ongoing digitalization combines virtual and experimental testing, conveying new concepts for more efficient testing approaches, and thus brings to the foreground challenges such as the interface between experiment and simulation, material and structure. This Special Issue aims to encourage authors, from academia and industry, to submit original contributions or review papers on the challenges for novel non-destructive monitoring approaches for structural integrity assessment, as well as the corresponding material characterization. ## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
