

Special Issue

Challenges of Distributed Computing and Edge Engineering for Intelligent Environments

Message from the Guest Editors

We are increasingly observing the process of the digitalization of public space on a global scale, both in large urban centers and local civic communities, or of other systems related to various business activities. An integral element of these changes are local processing systems offering distributed computing and edge engineering. Inherent here are the systems of sensors and actuators connected to the local data processing systems. Smart technologies supporting various spheres have shown progress and have brought us into a new era of intelligent environments. In this Special Issue, we want to present solutions that have been developed to identify and solve related problems, both in civil and industrial contexts.

Guest Editors

Dr. Grzegorz Pawłowski

Faculty of Engineering Management, Institute of Management and Information Systems, Poznan University of Technology, ul. J. Rychlewskiego 2, 60-965 Poznań, Poland

Dr. Mikołaj Baranowski

Faculty of Physics and Astronomy, Department of Physics of Functional Materials, Adam Mickiewicz University Poznan, Wieniawskiego 1, 61-712 Poznań, Poland

Deadline for manuscript submissions

closed (20 August 2025)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
