Machine Learning and IoT in Medical Practice: Research Applications and Population-Level Solutions

Message from the Guest Editors

Modern approaches to healthcare research and patient care have come to demand the seamless handling of large data quantities. In this aspect, artificial intelligence approaches are growing in popularity as a means of big data utilization for the construction of neural networks with decision-making capabilities. Correspondingly, the IoT concept is gaining an increasingly strong foothold in the world of medicine; interconnected biosensors, tele-monitoring systems, and cloud computing are all everyday parts of medical practice. Original works describing novel applications, feasibility studies as well as review articles are solicited for the purposes of this Special Issue. Topics of interest include, but are not limited to:

- AI and neural networks in basic and genomic research;
- Machine learning algorithms in cancer diagnosis;
- AI-assisted image diagnostics;
- Decision-making algorithms in multimodal patient care;
- IoT in patient monitoring;
- Mixed reality (MR)-assisted surgery.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
