

Special Issue

Editorial Board Members' Collection Series: IoT Sensing for Sustainability

Message from the Guest Editors

This special issue, IoT Sensing for Sustainability, aims to present the latest research advances in IoT sensing. The topics include but are not limited to new IoT sensing paradigms and methodologies, applications, predictive models empowered by machine learning and data analytics, IoT digital twins, sensing data security, as well as new case studies.

- IoT sensing
- environmental sensing
- machine learning
- digital twin
- data security
- sustainability

If you want to learn more information or need any advice, you can contact the Special Issue Editor Lucy wang via directly.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
