# Terahertz Sensors for Spectroscopy and Communications

### Message from the Guest Editor

For more than two decades, terahertz waves have attracted great attention from scientists and engineers alike. They can be utilized to investigate the unique electromagnetic properties of various materials. Tremendous efforts have been devoted to designing sensors and developing techniques for spectroscopy studies. Moreover, a plethora of devices and sensors have been proposed for terahertz communications systems. In this Special Issue, the recent findings in the field of terahertz sensors for spectroscopy and communication are pursued.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
