

## Special Issue

# Graphene-Based Sensors for Pharmaceutical and Biomedical Analysis

### Message from the Guest Editor

Pharmaceutical and biomedical analyses require highly sensitive and selective methods. Electrochemical sensors based on graphene materials are a very good alternative for standard methods of analysis performed in clinical and pharmaceutical laboratories. This Special Issue will emphasize new electroanalytical methods based on graphene sensors for pharmaceutical and biomedical analysis.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
