

Special Issue

Selected Papers from the 2nd Global IoT Summit: IoT Technologies and Applications for the Benefit of Society

Message from the Guest Editors

The Internet of Things (IoT) is leading to a new dimension of the Internet. IoT is driven by the integration and unification of all communication systems located around us. Thereby, the systems can provide ubiquitous communication and computing with the purpose of defining a new generation of services. The Internet of Things is a key enabler for the realization of new Smart-* realm (Smart Cities, Smart Buildings, Smart Factories, Smart Agriculture, Smart Mobility, etc.) as it allows for pervasive interaction with/between smart things, leading to an effective integration of information into the digital world. The aim of this Special Issue is to include selected papers from the 2018 Global IoT Summit (GloTS) <http://www.globaliotsummit.org/>, held 4–7 June, 2018, in Bilbao, Spain, describing research from both academia and industry and technical presentations on the recent advances in theory, application and implementation of Internet of Things concepts and IoT technologies and applications for the benefit of society. Prof. Dr. Antonio Fernando Skarmeta Gómez

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
