Human Activity Recognition in Smart Sensing Environment

Message from the Guest Editors

The aim of this Special Issue, entitled “Human Activity Recognition in Smart Sensing Environment”, is to attract high-quality, innovative, and original papers related to the field of exploiting sensor data in order to perform HAR-related tasks, regardless of the nature of the sensors themselves, which may be environmental, wearable, or a combination of the two. Topics of interests include, but are not limited to, the following:

Sensor data fusion;

Smartphone sensors;

Wearable sensors;

Human Activity Recognition (HAR);

Smart environments;

Ambient intelligence;

Ambient sensing;

Ambient assisted living;

Machine and deep learning solutions exploiting sensor data in HAR.
