

Special Issue

Application of Human-Computer Interaction in Life

Message from the Guest Editors

Dear Colleague, This Special Issue aims to present several theoretical and practical problems related to human-computer interaction, in addition to new discoveries, new ideas, and innovative improvements already made in this field. Topics of interest include, but are not limited to, the following:

- Information visualization
- Multimodal interfaces
- Multi-platform design
- Natural interaction
- Speech interfaces
- Tangible and organic interfaces
- Non-invasive brain computer interaction
- Emotional and affective interaction
- Adaptive and augmented interaction
- Context-aware interfaces
- User Interface Design for Ubiquitous Computing
- Intelligent interfaces
- Personal User Experience
- Virtual assistants

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
