## Human–Smarthome Interaction

### Message from the Guest Editors

This Special Issue deals with the problems, challenges, and potentials of the field of smart homes from the perspective of human–computer interaction and spans the spectrum from social science questions of acceptance and value systems to classical questions of system operation (usability) and the application of artificial intelligence (configuration, recommendation systems).

The topics include (but are not limited to):

- User Experience in Smart Homes
- Technology Acceptance of Smart Home Systems
- Societal Impact of Smart Home Systems
- Control Interface Issues
- Static Configuration Interface Issues
- Dynamic Configuration Interface Issues (Rule Definition)

For more information on the issues, please visit the Special Issue websites at:

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
