

Special Issue

Nanomaterials for Sensor Applications

Message from the Guest Editors

Sensors play vital roles for humans, machines and infrastructures to sense the environment, and make our modern lives smarter and safer. Nanomaterials and nanotechnologies are the key driving force to advance the development of sensors, from popular temperature sensors, humidity sensors, and gas sensors for industry, aerospace, and agriculture to IoT and wearable sensors for health, metaverse and more applications. It is our pleasure to invite you to submit your recent research in nanomaterials for sensing applications to this Special Issue, which provides an excellent opportunity to publish your work through this open access journal. Submissions of communications, full papers, and reviews are all welcome. We look forward to your contributions. For detailed information, please visit [here](#).

Guest Editors

Dr. Hui Huang

Singapore Institute of Manufacturing Technology, A*STAR, Singapore 138634, Singapore

Prof. Dr. Wei Luo

State Key Laboratory for Modification of Chemical Fibers and Polymer Materials, College of Materials Science and Engineering, Donghua University, Shanghai 201620, China

Deadline for manuscript submissions

closed (31 December 2024)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
