# Selected Papers from the IEEE International Conference of Cyber Security and Resilience 2021

### Message from the Guest Editors

The 2021 IEEE International Conference of Cyber Security and Resilience 2021 (IEEE CSR), First Edition was held from 26 to 28 July in a virtual mode (<http://www.ieee-csr.org/>). The IEEE CSR brought together members from academic and industry communities to present their achievements in cyber security and resilience in the context of cyber-physical systems. The conference is organized every year for the exchange of information on the progress of research and development in the field. The authors of selected high-quality papers that fit the Sensors scope of the conference are invited to submit extended versions of their original papers (50% extensions of contents of the conference paper). In addition to the IEEE CSR 2021 papers, other independent submissions are also welcome.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
