

## Special Issue

# Internet of Things and Wireless Sensor Network for Early Disease Detection

### Message from the Guest Editors

Early disease detection often allows physicians to address the process of healing, or reduce the problems caused by the disease, with much better results. In this sense, the Internet of Things may be a good way to collect personal health data and generate alarms that may be evaluated by health professionals. This Special Issue addresses the use of the Internet of Things (IoT) and Wireless Sensor Networks (WSN) to obtain health data and the processing of these data for early disease detection in people of all ages. For detailed information, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
