Advances in Signal Processing for GNSS and Complementary PNT Technologies—2nd Edition

Message from the Guest Editors

Many infrastructures, applications, and services that shape our lifestyle depend on the Global Navigation Satellite System (GNSS) and positioning, navigation, and timing (PNT) technologies.

This Special Issue aims to present advances in GNSS signal processing, including algorithms for fast acquisition and robust tracking in harsh terrestrial and space environments; algorithms for interference monitoring, detection, classification, and localization; new algorithms for GNSS/INS/visual sensors data fusion in contexts such as autonomous driving and guidance navigation and control systems; and the hybridization of GNSS-based systems with terrestrial Signals of Opportunity. Additionally, we are interested in orbital-filter-powered Bayesian state estimation algorithms and high-sensitivity signal acquisition and tracking loops. We welcome the submission of both preliminary and structured results of theoretical or experimental analyses, studies on using authenticated civilian signals to prevent spoofing, and pioneering studies of LEO signals proposed to augment positioning and navigation.

We look forward to your contributions to this exciting and rapidly evolving field.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
