Integrated Sensors Based on Silicon-on-Insulator (SOI)

Message from the Guest Editors

The need for miniaturized sensors and MEMS becomes ever more pressing considering the emergence of Internet of Things (IoT) applications, autonomous cars, structural health monitoring, smart maintenance and logistics in Industry 4.0, point-of-care medicine, smart cities, etc. Over the years, Silicon-on-Insulator (SOI) has proven to be a very adequate technology for the integration of high-performance sensors and MEMS, as well as of their analog and digital interfaces. The benefits of specific SOI features have been exploited, such as ultra-low-power, high-temperature reliability, radiation hardness, to name but a few. SOI research and industrial platforms have further enabled CMOS compatibility with novel materials and structures for sensing applications beyond traditional MEMS micromachining processes. Particular areas of interest include, but are not limited to:

- IoT, 5G Platforms
- Health, Medicine
- Automotive, Aeronautics, Space
- Smart Monitoring, Energy Harvesting
- Implantable, On-Body or Flexible Electronics, Wearables

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
