

Topical Collection

Underwater Sensor Networks and Internet of Underwater Things

Message from the Collection Editors

The aim of this Special Issue is to bring together academia and industrial researchers to present their recent research in the areas of UWSN and IoUT.

- UWSN and IoUT system optimization and deployment techniques
- Smart underwater sensors, devices, and things
- Artificial intelligence and deep learning techniques for IoUT
- Underwater data sensing, mining, and dissemination
- Underwater localization and tracking
- UWSN and IoUT security and confidentiality
- Underwater communication and networking technologies

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
