Advances in 3D Imaging and Multimodal Sensing Applications

Message from the Guest Editors

The main purpose of this Special Issue is to collect innovative contributions in 3D Imaging and Multimodal Sensing Applications (e.g., data reconstruction, data fusion, anomaly detection), ranging from new methodologies to innovative approaches in different domains. Particular emphasis should be given to processing data gathered by multimodal sensor systems to solve common issues known in the literature and present innovative best practices. Topics of interest include, but are not limited to:

- Industry 4.0;
- Smart agriculture;
- Aerospace robotics and automation;
- Digital;
- Cultural Heritage;
- Healthcare.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
