

## Special Issue

# Wearable Technologies and Sensors for Health Monitoring

### Message from the Guest Editor

Wearable health monitoring systems (WHMS) are transforming healthcare by providing non-intrusive, remote-access solutions for continuous biosignal monitoring. These devices enable ubiquitous point-of-care (POC) diagnostics and facilitate rapid medical intervention. Recent advances in this field have been made possible thanks to significant progress in multidisciplinary domains, including biosensors, RF antennas, energy storage devices, processing algorithms, and low-power communication protocols, enabling the development of cost-effective, low-power, and high-performance wearable devices. These innovations contribute to a more accessible and pervasive healthcare system. Consequently, ongoing research in WHMS should continue to explore low-cost materials and novel sensing technologies to further enhance performance, affordability, and integration of these devices. This Special Issue aims to showcase novel technologies that support advances in WHMS, including advanced sensors, flexible antennas, innovative energy storage solutions, intelligent processing algorithms, and communication networks.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
