

Special Issue

Computer Vision in AI for Robotics Development

Message from the Guest Editors

The integration of computer vision and machine learning techniques in robotics has enabled significant advancements in various applications (such as perception, navigation, and control). These techniques allow robots to process and understand visual information from their environment, leading to improved decision making and performance. We are inviting researchers, practitioners, and academics to submit their original and high-quality papers on the latest developments in the application of computer vision and machine learning in robotics. This Special Issue aims to foster discussions and collaboration within the community, and promote the advancements in this exciting field. For detailed information, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
