Advanced Materials for Sensing Application

Message from the Guest Editor

This Special Issue “Advanced Materials for Sensing Application” aims to push the boundaries of current sensor technology. We seek cutting-edge research on novel materials that offer higher sensitivity, smaller form factors, and multifunctional capabilities. We hope to foster interdisciplinary collaboration and accelerate the development of next-generation sensors for diverse fields, including healthcare, environmental monitoring, and the IoT. This Special Issue’s scope encompasses nanomaterials, composites, smart textiles, and other innovative material systems.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
