

Special Issue

New Trends in Biometric Sensing and Information Processing

Message from the Guest Editors

Biometrics is a fast-expanding and continuously evolving technology of the twenty-first century. Recent successes in electronics and computing stimulated the emergence of new sensing technologies, which in turn further expanded and accelerated the evolution of the already fast-growing field of biometrics. New sensors, systems, and applications are bound to extend the current biometric technology to a future that will witness unprecedented identification performance, privacy and security. The scope of this Special Issue includes emerging trends and recent advances in sensing-related technologies in application to biometrics. We suggest the following topics as the main development venues for Special Issue. - New sensor technologies with application to biometrics; - Wireless sensor networks for biometrics; - Internet of Things in application to biometrics; - New imaging modalities and technologies for biometrics; - New information processing methods for biometrics; - New machine learning algorithms for biometrics; - New systems and instruments for biometrics; - New applications of biometric sensing technologies; - Other emerging sensing technologies for biometrics.

Guest Editors

Prof. Dr. Liaojun Pang

Dr. Zhicheng Cao

Prof. Dr. Natalia Schmid

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
