

Special Issue

Biologically Inspired Sensing Technologies

Message from the Guest Editor

The scope of this Special Issue includes the design, fabrication, and characterization of biosensors for the rapid and accurate detection of disease markers, pathogens, and biomarkers, using biomimetic-inspired biosensing strategies. The covered categories encompass medical diagnostics for various diseases, environmental monitoring for the detection of pollutants, toxins, and contaminants in air, water, and soil, and biosensing technologies for food safety inspections, targeting foodborne pathogens and allergenic substances.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
