

## Special Issue

# Magnetic and Electromagnetic Sensors for Engineered Systems and Technologies

### Message from the Guest Editor

Because magnetic measurement and electromagnetic measurement can obtain physical information using wireless methods, they are applicable for various uses. In the special issue of "Magnetic and Electromagnetic Sensors for Engineered Systems and Technologies", the basic research study of magnetic measurement, electromagnetic measurement and related technology will be reported, which involves power electronics including motors, magnetic storage systems, bio-medical applications, the Internet of Things, non-destructive tests and energy harvest.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
