

## Special Issue

# Advanced Wearable Sensor for Human Movement Monitoring

### Message from the Guest Editor

Wearable sensors for human-movement monitoring have a broad range of applications, including healthcare, wellbeing monitoring, rehabilitation, and human-computer interaction. Despite rapid advancements in wearable sensor technology and computational algorithms, significant research challenges remain. High-quality data are crucial for data-driven human-movement monitoring algorithms. While the research community strives to share collected data, challenges remain regarding the ability to learn from heterogeneous sources of data and information. Can trained models be transferred or adapted to new environments and contexts or even individuals? In the absence of sufficient real data, what roles and limitations do synthetic data play in enhancing model performance? Additionally, considering the demanding requirements for continuous monitoring and processing, how can green computing solutions improve energy efficiency and manage model complexity while ensuring data privacy, for example, when cloud-based infrastructure is deployed?

### Guest Editor

Dr. Shuai Zhang

School of Computing, University of Ulster, York Street, Belfast BT15 1ED, UK

### Deadline for manuscript submissions

closed (28 February 2025)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
