

## Special Issue

# IoT in Smart Mobile Health Application

### Message from the Guest Editors

This Special Issue aims to bring together researchers and practitioners who are working in the development of these techniques to understand or address the issues related to the application of IoT in Smart Mobile Health Applications. We invite submissions of original research articles, review papers, and short communications related to the theme of this Special Issue. The keywords related to IoT in Smart Mobile Health Application are as follows:

- health monitoring;
- Internet of Things;
- smart Mobile;
- smart sensor
- health Application;
- wearable sensors;
- digital health;
- smart health monitoring;
- E-health;
- blockchain in health application;
- mobile health security and privacy;
- data analytics of IoT mobile health application

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
