Special Issue

Machine Learning in Cyber Physical Systems

Message from the Guest Editors

Industrial systems worldwide are undergoing a paradigm shift towards Industry 4.0. Self-decision making is the core characteristic of such systems, where machine intelligence is employed to accomplish tasks. Cyber physical systems is one such area of enabling technology necessary to create a seamless integration of cyber and physical components. The digital twinning of physical systems is rapidly developing, and can correlate large real-time sensing and IoT data. Sensor fusion, machine learning, AI, and other advanced techniques are applied to create a dynamic virtual representation of entire systems. For detailed information, please visit here.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
