

Special Issue

Thin Film Materials and Nanostructure Devices for Sensing Applications: 2nd Edition

Message from the Guest Editors

We welcome cutting-edge research on thin film and nanostructured sensors for diverse applications - from biomedical diagnostics to environmental monitoring and Industry 4.0. This edition builds on our successful first volume, focusing on novel material synthesis, device engineering (including photonic/magnetoplasmonic systems), and performance optimization of sensors for light, temperature, strain, and biochemical detection. Contribute your original work on advanced characterization, micro/nanofabrication techniques, or stability enhancements that push the boundaries of current sensing technologies. Join us in shaping the next generation of high-sensitivity, reliable sensor solutions! For more details, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
