

## Special Issue

# Smart Composites for Structural Health Monitoring

### Message from the Guest Editor

Despite progress in developing composites with sensing, actuating, and energy-harvesting capabilities, there is a gap in the practical implementation of laboratory prototypes in real-life structures. The potential benefits of these emerging materials, including spatially distributed sensing, are substantial for improved safety, reduced maintenance costs, and an extended asset life. To bridge the gap between the research and practical applications, this Special Issue seeks to publish theoretical and experimental studies on the implementation of smart composite materials for SHM. We welcome submissions on field investigations and case studies that involve the use of smart composites for engineering structures, as well as studies on characterizing and packaging smart composites for field implementation. The aim of this Special Issue is to provide a platform for researchers and professionals to share their insights, challenges, and solutions on the practical use of smart composites for SHM. For detailed information, please visit [here](#). Dr. Fae Azhari

### Guest Editor

Prof. Dr. Alfredo Güemes

Department Aeronautics, Polytechnic University of Madrid, 28040 Madrid, Spain

### Deadline for manuscript submissions

closed (31 October 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
