Distributed Computing Related to Sensor Networks

Message from the Guest Editors

Multi-agent systems (MAS) are new and emerging systems that converge many areas, from nature science to practical engineering. As we know, MAS consist of many individual agents that contain sensors, computers, and actuators interconnected by communication networks. In many practical cases, distributed computing based on local sensing and communication between neighbor agents is required. Thus, MAS with distributed computing are engineered systems that integrate sensing computation, communication, and control. Because of the limitations of information and capacity, distributed computing leads to new scientific and technical challenges. Moreover, important topics such as distributed estimation, learning and optimization, game and security, and control should be paid more attention to in order to achieve successful application requirements.

Guest Editors

Prof. Dr. Francisco Falcone

Department of Electrical, Electronic and Communication Engineering & Institute for Smart Cities (ISC), Public University of Navarre, 31006 Pamplona, Spain

Dr. Yiguang Hong

Shanghai Research Institute for Intelligent Autonomous Systems, Tongji University, Shanghai, China

Deadline for manuscript submissions

25 November 2025

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
