Special Issue

Lightweight Security Integrity and Confidentiality for Internet of Things (IoT)

Message from the Guest Editors

Internet of Things (IoT) devices show a very wide range of resource constraints, such as processing capacity and memory. The energy availability also shows a wide spectrum from intermittent/harvested energy source powered devices to those continuously connected to a power source device. This makes it challenging to provide security properties such as integrity, confidentiality, and availability. This Special Issue welcomes papers on all aspects of ensuring security properties in IoT ecosystems. The topics include but are not limited to the following:

- Cyber intrusion and detection in IoT;
- Data provenance in IoT;
- Security, trust, and privacy in IoT and IoT-based smart ecosystems;
- Lightweight data and execution state integrity and confidentiality in IoT;
- Lightweight cryptographic and post-quantum cryptographic solutions in IoT;
- Hardware security primitives in IoT (e.g., physically unclonable functions and true random number generators);
- Side-channel attacks and protection in IoT;
- Intermittent/harvested-energy-based cryptographic and security solutions in IoT;
- Solving energy and cybersecurity constraints in IoT.

Guest Editors

Prof. Dr. Akhilesh Tyagi

Department of Electrical and Computer Engineering, Iowa State University, Ames, IA 50011, USA

Prof. Dr. Himanshu Thapliyal

Department of Electrical and Computer Engineering, University of Kentucky, Lexington, KY 40506, USA

Deadline for manuscript submissions

closed (19 August 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
