

## Special Issue

# Laser Sensors for Displacement, Distance and Position

### Message from the Guest Editor

Laser sensors can be used to measure distances to objects and their related parameters (displacements, position, surface profiles, velocities and vibrations). Laser sensors are based on many different optical techniques, such as triangulation, time-of-flight, confocal and interferometric sensors. As laser sensor technology has been improved, the size and cost of sensors have decreased, which led to widespread use of laser sensors in many areas. In addition to traditional manufacturing industry applications, laser sensors are increasingly used in robotics, surveillance, autonomous driving and biomedical areas. Topics of interests include (i) improvement of basic laser sensor technology (sensor design and modelling, new sensor technology), (ii) sensor signal processing (calibration and filtering algorithm), and (iii) applications to various areas. Review papers on this topic are also welcome. For further information, please visit [http://www.mdpi.com/journal/sensors/special\\_issues/LSSSP](http://www.mdpi.com/journal/sensors/special_issues/LSSSP).

### Guest Editor

Prof. Dr. Young Soo Suh

Department of Electrical Engineering, University of Ulsan, 93 Daehak-ro, Nam-gu, Ulsan (44610), Korea

### Deadline for manuscript submissions

closed (20 February 2019)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
