

Special Issue

Advancements and Applications of UAV Communications with RF, Microwave, and mmWave Techniques

Message from the Guest Editor

Unmanned Aerial Vehicles have emerged as pivotal tools across various industries, ranging from the military and surveillance to agriculture and disaster management. This Special Issue explores the recent advancements and applications of UAV communications, focusing on the integration of Radio Frequency, microwave, and millimeter-wave techniques. The evolution of communication technologies has significantly enhanced UAV capabilities, enabling robust and reliable data transmission for real-time surveillance, remote sensing, and collaborative mission execution. This SI delves into the challenges and opportunities associated with employing RF, microwave, and mmWave frequencies for UAV communication, addressing issues such as signal attenuation, interference, and bandwidth constraints. Furthermore, it highlights innovative solutions and engineering strategies that leverage these frequency bands to optimize communication performance, extend operational ranges, and enhance data transfer rates. The applications discussed encompass a wide array of sectors, including agriculture, environmental monitoring, disaster response, and communication relay in areas with limited infrastructure.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
