

## Special Issue

# Motion Analysis in Biomedical Engineering

### Message from the Guest Editors

Biomedical signal processing involves acquiring and preprocessing physiological signals and extracting meaningful information to identify patterns and trends within the signals. Sources of biomedical signals include neural activity, cardiac rhythm, muscle and skeleton movement, and other physiological activities. The Special Issue concerns the new methods of analysis of human motion treated as a biomedical signal.

Depending on the acquisition method, time series may encode motion in the form of orientations, positions, accelerations, or angular velocities in 3D. Combined with other biomedical signals, which are more and more easily accessible through wearable devices, it can be an essential source of information on the psycho-physical condition during daily life activities. This is an interdisciplinary and fast-developing field with wide and promising biomedical applications, human-computer interfacing, and surveillance systems for monitoring human behaviors as well as analysis of biomedical signals for diagnosis and rehabilitation applications.

- Biomedical signals
- Wearable devices
- Human motion analysis
- Artificial intelligence (AI)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
