Medical Applications of Electronic Nose Technologies

Message from the Guest Editors

Medical diagnostic techniques began with human senses and have evolved to include ever more sophisticated electronic wave form analysis, blood and bodily fluid testing, ultrasonic, and radiographic and genetic techniques (to name a few). The senses of taste and smell were among the earliest diagnostic tools, described by the earliest physicians, and yet they remain tantalizingly underused. This Special Issue of *Sensors* will be devoted to articles describing diagnostic applications of electronic taste and smell sensing in medical and veterinary care using chemical, gas, optical, electrical, biological/cellular, and other novel technologies. Submissions may focus on screening for disease, diagnosing disease or monitoring the course of/response to treatment of disease. For detailed information, please visit [here](#).

Guest Editors

Prof. Dr. C. William Hanson

Anesthesiology and Critical Care at the Hospital of the University of Pennsylvania

Prof. Dr. Erica Thaler

Otorhinolaryngology–Head and Neck Surgery, University of Pennsylvania, Hospital of the University of Pennsylvania

Deadline for manuscript submissions

closed (31 July 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
