Selected Papers from MASCOTS 2020 and Workshop

Message from the Guest Editors

Advances in Performance Analysis and Quality of Service Engineering The 2020 IEEE MASCOTS Conference is the 28th in the Series on Modelling, Analysis and Simulation of Computer and Telecommunication Systems. This Special Issue invites the submission of extended papers from among those that were accepted in the main program or the Workshop of this conference. Topics that are covered include analytical models, measurement experiments, performance optimization and the use of machine learning to interpret and exploit measurement data and optimize system performance.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
