Special Issue

Machine Learning and Signal Processing Based Fiber-Optic Acoustic Sensor

Message from the Guest Editor

Acoustic detection is an important information-accessing technique that has widespread applications in a large variety of civil and military activities, including environmental noise monitoring, early warning of natural disasters, detection and tracking of unmanned aerial vehicles (UAVs), underwater detection, oil and gas pipeline leakage monitoring, wind turbine measurements, photoacoustic imaging, health monitoring, etc. The traditional acoustic sensor is difficult to be applied in harsh environments, and the maintenance cost is so high that it cannot meet the needs of modern engineering measurement. This Special Issue will focus on the current state-of-the-art optical fiber acoustic sensors systems and their applications. Potential topics include but are not limited to: optical sensors acoustic sensors optical fiber sensors optical fiber acoustic sensors distributed optical fiber sensors

Guest Editor

Prof. Dr. Zhimei Qi

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
