

Special Issue

Multifunctional Materials Sensors for Theranostic Nanomedicine

Message from the Guest Editor

Sensors welcomes submissions to this Special Issue entitled “Multifunctional Materials Sensors for Theranostic Nanomedicine”. The main themes and keywords to guide potential authors are as follows:

- Multimodal imaging applications that use nanoparticles, with a particular interest in real-time monitoring of therapeutic molecules as well as imaging and diagnosis tools.
- Challenges and perspectives with nanoparticles with sensing capabilities in medicine.
- Nanotechnology-based approaches for developing multifunctional and targeting strategies, leading simultaneously toward the detection, diagnosis, and treatment of cancer and other diseases.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
