Special Issue

Advancements in GNSS Precise Point Positioning Technology and Applications

Message from the Guest Editors

The goal of this Special Issue is to highlight such recent developments. The topics of interest include, but are not limited to, the following:

- Multi-GNSS multi-frequency PPP and PPP-RTK models and algorithms;
- Precise positioning with high-grade and low-cost receiver/antenna equipment;
- Integer carrier-phase ambiguity resolution;
- Observation-level integration of GNSS and other sensors (IMU, cameras, Lidar, etc.) for urban navigation;
- LEO-augmented PPP and PPP-RTK;
- Galileo HAS, BDS-3 PPP-B2b, QZSS CLAS.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
