

## Special Issue

# Molecular Sensing, Communications and Processing

### Message from the Guest Editor

ICT technologies that operate at microscopic scales have recently had a strong boost in the biological field. Research activities are aimed at collecting data representing the state of biological systems, codifying it adequately, and using the information of interest to modulate molecular signals. The systems under study can either be inspired by biological processes in living bodies, such as molecular pathways in cells and information transport through blood vessels, or be synthetic. All together, they are contributing to the birth of the Internet of bio-nano things (IoBNT) concept. This Special Issue intends to collect contributions in the following areas:

- Data collection through biosensors and ingestion in molecular communication systems;
- Sensing and data processing using omics technologies;
- Data storage in bio-compatible environments;
- Molecular transmission systems and interworking;
- Applications of molecular communications.

### Guest Editor

Prof. Dr. Gianluca Reali

Networks and Services Lab, Department of Engineering, University of Perugia, 06123 Perugia, Italy

### Deadline for manuscript submissions

closed (10 May 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
